

# Compass an SDG

## Step 1: Ready Your Compass

Draw your own copy of the Sustainability Compass or prepare a copy of the template on the next page.

## Step 2- Choose Your Focus

Pick one of the United Nations Sustainable Development Goals (SDGs) to focus on and write it in the center of your Sustainability Compass.

## Step 3: Research your SDG

Do some research on your SDG, potentially with a focus on your own country or region. A useful place to begin research is the UN Development Program (UNDP) website, [linked here](#). Many countries also have websites and programs dedicated to SDG data.

## Step 4: Orient Your Thinking

Write down factors that cause and are effected by your SDG in the Compass Points. It can be useful to begin with one Compass Point and then rotate your thinking though all four perspectives a couple of times to make sure that you are reflecting holistically.

## Step 5: Making Your Thinking Visible

Once you have finished adding to your Compass points, draw arrows between ideas to visibly demonstrate any interrelationships that you notice. You may choose to annotate your arrows to explain these connections.
