

# The Master Class Sustainability AcceleratorPro

TRAINING

**SIGN UP**

April 29 - May 1, 2023 | Hanoi, Vietnam

## The training experience

This 3-day Master Class will provide participants with a suite of innovative, proven tools, techniques and stakeholder engagement and consultation processes that strengthen and Accelerate your own or your organization's sustainability practice.

The Sustainability Accelerator is a comprehensive suite of professional tools for serious sustainability practitioners. Built on the architecture of our open-source VISIS Method – Vision, Indicators, Systems, Innovation, Strategy – Accelerator helps you manage and streamline the complex and challenging demands of sustainability work. The Accelerator tools can support you, your colleagues, and your clients or suppliers during the whole sustainability journey, from initial awareness-raising to training, planning and implementation.

- Learn how to move diverse stakeholders to agree to move forward together on sustainable development initiatives.

# WHAT IS THE SUSTAINABILITY ACCELERATOR TOOLSET

**THE SUSTAINABILITY ACCELERATOR** is a comprehensive toolkit for supporting and facilitating sustainable development initiatives of all kinds. The tools in the Accelerator toolkit can be adapted and integrated with existing sustainability programs, frameworks and approaches such as GRI, ISO 26000, Balanced Scorecard, ESG and Circular Economy, or it can serve as a stand-alone framework. Like a physical toolbox, it contains separate tools that can be used for different sustainability related tasks. The Sustainability Accelerator is comprised of the following tools:

**SUSTAINABILITY COMPASS:** An accelerator tool used for framing, defining, analyzing, assessing and measuring progress and for engaging the right stakeholders. Compass tools have been used by large and small companies, regional planning groups, communities and investors.

**PYRAMID:** An accelerator tool for sustainable development training, planning, team-building and multi-stakeholder process for building consensus around a course of action.

**AMOEBA:** An accelerator tool for accelerating sustainability innovation and managing change, which includes the Amoeba game simulation-based training module, also known as the Innovation Diffusion Game, and related planning tools.

**STRATESPHERE:** An accelerator tool for strategic planning for sustainable development, a strategic planning package, together with document templates, assessment and evaluation tools.

## ABOUT THE TRAINERS

**Robert Steele** is founder/director of Systainability Asia, a regional Sustainability Consulting and Training firm based in Thailand. Robert is one of the most experienced trainers in the theory and applications of the Sustainability Accelerator Toolkit, with over 100 workshops and consultations under his belt. Robert specializes in the areas of indicator development, systems thinking, innovation diffusion, organizational sustainability assessment and strategic planning. He consults to UNEP, UNDP, UNESCO, ASEAN and several regional governments, NGOs, and private sector clients in the Asia-Pacific region.

**Kate Doré** is currently the MSHS Service Learning Coordinator at the United Nations International School in Hanoi, Vietnam. She has been an educator for over twenty years, working with learners of all ages both in and outside schools - and facilitating workshops with Compass Education since 2015. Kate holds a M.A. in Education focusing on curriculum development and science literacy; as well as postgraduate degrees in Business Management, School Leadership, and Sustainability Education.

**Kate O'Connell** is a seasoned education leader, coach, and speaker with nearly 3 decades of experience in education and sustainability. When coaching, she uses her expertise in NeuroLinguistic Programming (NLP) Coaching, systems thinking, and change management to promote growth for good. She is recognized as a knowledgeable expert in the International Baccalaureate and Compass Education. She also leads workshops for Trust-Based Observations and enjoys speaking at conferences and events.
