FACILITATED BY EDUCATORS, FOR EDUCATORS

"The training was both inspiring and forward-thinking, going beyond traditional teaching methods to address global challenges. It motivated me to think innovatively and take action towards shaping a better future for our world."

—Rajwant S., Colegio Anglo Colombiano

COMPASS EDUCATION

COMPASS EDUCATION

ABOUT THIS WORKSHOP

Participants will explore the concept of sustainability with specific emphasis on the role of education and the use of systems thinking to enhance student learning and engagement as global citizens. The workshop will be a mix of theory and practice; educators will see examples of these tools in practice and be invited to innovate and strengthen their lessons, units, and programs. Whether running a school, facilitating a conversation in your classroom or working with young people in other contexts, this workshop is for you!

IN THIS WORKSHOP, YOU WILL

- Discuss the imperative for sustainability education in a global context
- Identify sustainability dispositions and examine their compatibility with your personal educational philosophy and institutional values
- Understand the relationship between sustainability and systems thinking
- Explore the educational uses of system thinking tools
- Discover how sustainability habits of mind can be integrated into teaching and learning
- Develop unit/lesson plans to include sustainability perspectives and systems thinking tools in your classroom

WHO SHOULD PARTICIPATE

Educators and program leaders who want to integrate sustainability education and system thinking into their teaching practice. It would also be of value to curriculum leaders and administrators interested in understanding what the practical application of sustainability education looks like.

WHAT YOU WILL TAKE AWAY FROM THIS WORKSHOP

- A practical understanding of sustainability and systems thinking
- Powerful conversations and practical analysis of your educational setting
- Useful tools that can be integrated into any curriculum and every class level
- Access to our database of educator-sourced lesson plans
- Professional networking with like-minded educators
- Receive a Compass Education Level 1 "Compass Practitioner" Certificate of Participation
- Become eligible for advanced learning opportunities and a pathway to becoming a Compass Facilitator

WHAT OUR PARTICIPANTS SAY ABOUT THIS WORKSHOP

"Thank you, Compass Education, for being the moral compass the education world in particular and the world in general, needs! This is the work I have always imagined education should be about, and Compass is helping me to see the possibilities for making this vision of education a reality."

—Derek C., American School Foundation of Guadalajara

"Relevant, meaningful and timely! This is the workshop all educators should do as part of professional development aimed at encouraging our students to be proactive, collaborative, critical thinkers who make a positive difference in the world we live in."

—Jason H., UWCSEA Singapore
