SYSTEMS THINKING FOR SUSTAINABILITY IN THE CLASSROOM

Introduction to the Compass Tools

Are you looking to build a culture of sustainability in your school? Do you want to integrate systems thinking into your community through accessible and adaptable tools?

This highly interactive workshop series is intended for educators in **Africa**. Participants will leave this series with a plan to use systems thinking to integrate sustainability into their work.

OCTOBER 3, 10 & 17
3:00 PM UTC

Zoom details will be shared with accepted applicants only

www.compasseducation.org

"The workshop was run in a well-tuned and right-fit style and brought great concepts, models, and time to integrate positive growth into our thinking and practice. I left feeling like our team was better prepared to influence our school's learning toward a more impactful growth of a sustainability mindset."

—Magda G., American International School of Budapest

ABOUT THIS WORKSHOP

This flexible, three-part program enables schools to efficiently and effectively introduce educators, administrators and support staff to the fundamentals of sustainability and systems thinking. The process is designed to scaffold learners in systems processes through the introduction of two of the most important and useful systems thinking tools; the Sustainability Compass and Systems Iceberg.

WHAT YOU WILL TAKE AWAY FROM THIS COURSE

- A shared language for the whole faculty or school conversations about sustainability and systems and framework for reflecting on issues systemically.
- Powerful conversations make sense of complex issues.
- Lesson ideas that educators can use in their classrooms the next day, next week or as soon as they're ready!
- Useful tools that can integrate sustainability and systems into any curriculum and every class level.
- Access to our database of educator-sourced lesson plans.
- Connection to a global movement of educators for sustainability education.

WHO SHOULD PARTICIPATE

Any classroom educator or school administrator currently working in **Africa** and eager to bring sustainability and systems thinking into their classrooms, communities, and culture is eligible to register. This workshop will be held in English.

WORKSHOP OVERVIEW

Part 1: Introduction to Systems Thinking with the Sustainability Compass

This session highlights a tool called the Sustainability Compass which engages us in systems thinking- a way of looking at the world that emphasizes interconnectivity and interdependence.

Part 2: Using the Iceberg to Deepen Our Understandings

This session dives deep into using the Systems Iceberg Model, a systems thinking tool designed to evaluate a problem or event by examining the root causes, underlying structures and mental models that can trigger it.

Part 3: Action Planning and Curriculum Design

We will study examples of curriculum design in a broad range of topics, age groups and subjects. Participants will be able to work independently or in small groups to design an action plan or curriculum plan to engage their students in systems thinking.

WHAT OUR PARTICIPANTS SAY ABOUT THIS WORKSHOP

"This is such a great workshop. It's practical, gives you tools that you can apply in multiple ways with minimal effort and helps give us a framework for empowering students to engage and act within sustainability."

—Lindsay R., International School Manila

"The workshop was run in a well-tuned and right-fit style and brought great concepts, models, and time to integrate positive growth into our thinking and practice. I left feeling like our team was better prepared to influence our school's learning toward a more impactful growth of a sustainability mindset."
