FACILITATED BY EDUCATORS, FOR EDUCATORS

"This course may be the most important thing you do right now, both in terms of sustainability and pedagogy. The approaches and tools not only encourage and foster shifts towards sustainability but they also promote powerful thought-processes that will empower the young people of today at a time when that empowerment is more important than ever."

Sam, AIS Mozambique

ABOUT THIS COURSE

This is a 7-week (regular) or 2-week (intensive) cohort-based, asynchronous, facilitator-guided course using independent and collaborative learning methods. Participants will explore the concept of sustainability with specific emphasis on the role of education and the use of systems thinking to enhance student learning and engagement as global citizens. Whether running a school, facilitating a conversation in your classroom or working with young people in other contexts, this course is for you!

IN THIS COURSE, YOU WILL

- Discuss the imperative for sustainability education in a global context
- Identify sustainability dispositions and examine their compatibility with your personal educational philosophy and institutional values
- Understand the relationship between sustainability and systems thinking
- Explore the educational uses of systems thinking tools
- Discover how sustainability habits of mind can be integrated into teaching and learning
- Develop unit/lesson plans to include sustainability perspectives and systems thinking tools in your classroom

WHO SHOULD PARTICIPATE

Educators and program leaders who want to integrate sustainability education and systems thinking into their teaching practice. Curriculum leaders and administrators interested in understanding what the practical application of sustainability education looks like.

WHAT YOU WILL TAKE AWAY FROM THIS COURSE

- A practical understanding of sustainability and systems thinking
- 1-1 mentorship and feedback from your Compass facilitator
- Powerful conversations and practical analysis of your educational setting
- Useful tools that can be integrated into any curriculum and every class level
- Access to our database of educator sourced lesson plans
- Professional networking with a global cohort of educators
- Receive a Compass Education Level 1 "Compass Practitioner" Certificate of Participation
- Become eligible for advanced learning opportunities and a pathway to becoming a Compass Facilitator

WHAT OUR PARTICIPANTS SAY ABOUT THIS COURSE

"I love the part of this course that encourages big, enthusiastic dreaming and thinking on how we CAN change the world by shifting our educational mindset. This course offers a range of teaching methods from articles, videos, tasks and reflective feedback in a collaborative forum. It's a great course!"

—Rachel, UWCSEA Singapore

"This course taught me that, by changing the lens through which we teach and creating opportunities for students to be skeptical and think critically, it is not actually such a daunting task to create a generation of changemakers."

—Rachel, American School of Guatemala
